***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants' method of making propylene glycol is unobvious over the prior art of record. Although it is generally known in the art that alkylene glycols may be prepared by hydrogenating the corresponding hydroxycarboxylic acids or hydroxylcarboxylic acid esters with a variety of catalysts including multimetallic catalysts, the prior art of record does not teach or suggest adding acid prior to hydrogenating the reactants in the presence of a multimetallic catalyst. Such a modification affords the improved yields and selectivities, which are presently claimed, of the desired propylene glycol. All claims (10-16) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
